

ABSTRACT

OXIDATION DYE COMPOSITION FOR KERATIN FIBRES  
COMPRISING A NONIONIC AMPHIPHILIC POLYMER

Ins B5

The invention relates to an oxidation dye composition for keratin fibres, and in particular for human keratin fibres such as the hair, comprising, in a medium which is suitable for dyeing, at least one oxidation dye precursor and optionally one or more couplers, characterized in that it also comprises a nonionic amphiphilic polymer containing at least one fatty chain and at least one hydrophilic unit.

The invention also relates to the processes and dyeing devices using the said oxidation dye composition.
